MADE IN DENMARK

REV08/16

Welcome to your new Tire Taxi EX, an innovative way to move, transport and stack wheel and tire assemblies. This product was specifically designed to provide a simple, safe and more ergonomic way to transport tires.

## Features:

- Transport four (4) tires & wheel assemblies or eight (8) tires
- Four heavy-duty 3" casters
- Includes one locking caster
- Maximum load: 265lbs./120kg

## Benefits:

- Reduces strains on knees, back and shoulders
- Reduce unnecessary lifting
- Increase technician productivity
- Increase shop efficiency

## WARRANTY

One (1) year warranty against manufacture defects in material and workmanship.

## WARNING

This product was specifically designed to transport tire and wheel assemblies, and is **NOT** intended for any other use.

## TOOL INCLUDED

5mm Stubby Ball End Allen Wrench

## Assembly Instructions

1. Install the first wheel and steel tube as follows. Guide the screw through the round bracket of the wheel and firmly screw the first steel tube on the screw. **(See Fig. 1a and 1b)**
2. Start by screwing the steel tube firmly by hand and then tighten with an Allen wrench. **(See Fig. 2)**
3. Do the same with the other wheels and steel tubes. **(See Fig. 3)**
4. Place the top Tire Taxi on the four steel tubes. **(See Fig. 4)**
5. Fasten the screws and then tighten firmly with the Allen wrench. Tire Taxi EX is now ready for use. **(See Fig. 5)**
