E465-065-10 Torque tip style "C" replacement tip

E490-000-12 Replacement gear assembly

All kits both 2 and 3 plate are designed to balance all 4,5,6,and 8 lug bolt patterns up to 180mm in diameter. This will cover about 98% of all vehicles out there. They will work on any balancer brands out there.

Any part # with 818 in the middle is for the auto clamp shafts. Any part # with 400 in the middle is for threaded shafts.

Most of the balancer shafts out there are 40mm in diameter and we make the product to fit that. There are a few brands that have a 36mm shaft. The customer will need to let you know that before ordering so we can insert the reducing sleeves enabling the adaptors to work.
